EDUCATION

IU Indianapolis

B.A. Artificial Intelligence

Indianapolis, IN

August 2022 – May 2027

- **GPA:** 3.00
- **Relevant Courses:** Natural Language Processing, Robotic Process and Cognitive Automation Development, Enterprise Cognitive Automation, Applications of Data Mining, Deep Learning Neural Networks, Data Science, Collaborative Human-AI Systems, Biostatistics.

PROJECTS & OUTSIDE EXPERIENCE

NBA All Star Prediction Model

Avon, IN

May 2026 – June 2026

- Developed a Random Forest machine learning model to predict NBA All Star selections using over 23,000 historical player seasons and performance statistics.
- Merged multiple datasets, engineered binary classification labels, and performed exploratory data analysis to identify relationships between player performance and All Star selections.
- Evaluated model performance using accuracy, precision, recall, confusion matrices, and feature importance analysis, achieving 97.46% overall accuracy.
- Identified Player Efficiency Rating (PER), Points Scored (PTS), and Win Shares (WS) as the strongest predictors of NBA All Star selections through feature importance analysis.

Data Analysis Project

Avon, IN

May 2024 - June 2024

- Performed exploratory data analysis on a bird strike dataset containing 10,000+ records using Python and Excel.
- Cleaned and organized raw data to improve analysis accuracy and reporting quality.
- Created visualizations, pivot tables, and descriptive statistics to identify trends in altitude, engine count, and time of day.
- Communicated findings through charts and summary reports.

SQL Database Project

Avon, IN

August 2025 - December 2025

- Queried and analyzed customer and purchase data using MySQL to answer business focused questions.
- Wrote SQL statements using JOIN, GROUP BY, WHERE, and aggregate functions to retrieve and summarize data across multiple tables.
- Applied database concepts including primary keys, foreign keys, and table relationships.

Fiserv Security Officer

Indianapolis, IN

January 2026 - Current

- Utilized CCURE 9000 access control software to manage employee credentials, access permissions, and badge activity records, troubleshooting software and system issues within the CCURE 9000 platform, including service restarts and operational support to maintain system availability.
- Generated and analyzed access control reports by querying badge reader and door activity data, exporting results to Excel for leadership and compliance reporting.
- Accurate data retrieval requests using system logs and reporting tools.

ACTIVITIES & LEADERSHIP

IUI Somali Student Association

Club Member

Indianapolis, IN

September 2024 - Present

SKILLS & INTERESTS

Skills: MySQL, Sci-kit Learn, Java, Python, Object Oriented Programming, Hubspot, Software administration.

Interests: Basketball/NBA, Investing, Photoshop, App Development, Video Editing

Languages: English (fluent), Somali (native), Arabic (fluent)
